

TVETMARA LEDANG		PROJECT MANAGEMENT LOGBOOK (PLO10 - TO BE COMPLETED BY SV)															
PROGRAMME :		DIPLOMA IN BIOMEDICAL ELECTRONICS ENGINEERING					WEEK 18										
COURSE :		DBD/DBR/DBI/DBT/DBL - 51014 FINAL YEAR PROJECT															
SEM / SESSION :		5 / JUL - DEC 2026			CLASS :		ASSESSMENT										
STUDENT NAME :					MATRIX ID :		10%										
Marks are awarded based on the number of criteria fulfilled by the student: <table border="1"> <tr> <th>Week</th> <th>Poor</th> <th>Fair</th> <th>Good</th> <th>Excellent</th> </tr> <tr> <td>Fulfils 1 of the listed criteria</td> <td>Fulfils 2 of the listed criteria</td> <td>Fulfils 3 of the listed criteria</td> <td>Fulfils 4 of the listed criteria</td> <td>Fulfils ALL listed criteria</td> </tr> </table>								Week	Poor	Fair	Good	Excellent	Fulfils 1 of the listed criteria	Fulfils 2 of the listed criteria	Fulfils 3 of the listed criteria	Fulfils 4 of the listed criteria	Fulfils ALL listed criteria
Week	Poor	Fair	Good	Excellent													
Fulfils 1 of the listed criteria	Fulfils 2 of the listed criteria	Fulfils 3 of the listed criteria	Fulfils 4 of the listed criteria	Fulfils ALL listed criteria													
DOMAIN	PLO 10 - Project Management																
ETAC 2024	Criteria				Marks	Factor	Mark Obtained										
	Project Planning & Schedule Management																
	Clear project objectives stated - Objectives are written clearly and aligned with the FYP title and scope. Work breakdown structure defined - Project tasks are broken into logical phases such as design, development, testing, and documentation. Timeline / Gantt chart provided - Timeline shows start and end dates for all major activities. Milestones logically sequenced - Milestones follow correct technical order without unrealistic overlaps. Schedule updated consistently - Any changes, delays, or adjustments are recorded with justification.																
	1	1	2	3	4	5											
	Weak	Poor	Fair	Good	Excellent	2.00											
	Decision-Making & Problem-Solving Record																
	Problem identified and documented - Technical or project-related problems are clearly described. Alternatives considered - More than one possible solution or approach is recorded. Justification of chosen solution - Selected solution is supported by technical or practical reasoning. Action taken recorded - Steps taken to implement the solution are documented. Outcome reviewed and reflected - Effectiveness of the solution is evaluated after implementation.																
	2	1	2	3	4	5											
	Weak	Poor	Fair	Good	Excellent	2.00											
	Technical Progress Documentation																
	Design development recorded - Schematics, flowcharts, diagrams, or design evolution are shown. Calculations / technical reasoning shown - Important calculations, parameters, or logic are explained. Standards / datasheets referenced - Relevant datasheets, manuals, or standards are cited. Iteration or modification logged - Design changes from the original plan are recorded with reasons. Technical accuracy maintained - Entries show correct technical understanding with no major errors.																
	3	1	2	3	4	5											
	Weak	Poor	Fair	Good	Excellent	2.00											
	Task Allocation & Responsibility Tracking																
	Tasks clearly assigned - Responsibilities of each member are clearly stated. Roles aligned with skill set - Tasks assigned match each member's technical capability. Task dependencies shown - Relationships between tasks are clearly indicated. Individual contribution evident - Student's own contribution is clearly identifiable. Task completion tracked - Progress status such as completed, ongoing, or delayed is shown.																
	4	1	2	3	4	5											
	Weak	Poor	Fair	Good	Excellent	2.00											
	Consistency & Logbook Discipline																
	Regular entries maintained - Logbook entries are written consistently (weekly or bi-weekly). Dates clearly recorded - Each entry includes an accurate and valid date. Activities align with project phase - Recorded work matches the current project stage. No missing critical weeks - No unexplained gaps during important project periods. Professional writing quality - Entries are clear, structured, and written in formal technical language.																
	5	1	2	3	4	5											
	Weak	Poor	Fair	Good	Excellent	2.00											

6	Goal Setting (SMART)							
	Specific goals - Goals clearly state what needs to be achieved.							
	Measurable outcomes - Goals include criteria that allow progress to be measured.							
	Achievable targets - Goals are realistic within available time and resources.							
	Relevant to project - Goals directly support the FYP objectives.							
7	Supervisor Interaction							
	Meetings logged - Supervisor meeting dates and purposes are recorded.							
	Feedback recorded - Supervisor comments and advice are clearly written.							
	Actions from feedback shown - Improvements made based on feedback are documented.							
	Progress updates documented - Progress is reported clearly and systematically.							
8	Risk, Issue & Change Management							
	Risks identified - Potential technical or schedule risks are identified early.							
	Issues recorded - Actual problems encountered during the project are recorded.							
	Mitigation actions - Preventive or corrective actions are described.							
	Changes justified - Design or scope changes are supported with valid reasons.							
9	Resource & Material Management							
	Materials listed - All components or materials used are listed.							
	Tools/software recorded - Equipment, instruments, and software tools are identified.							
	Resource usage justified - Reasons for selecting specific resources are explained.							
	Constraints documented - Budget, availability, or technical constraints are stated.							
10	Reflection, Learning & Ownership							
	Weekly reflection - Student reflects on progress, challenges, and achievements.							
	Lessons learned - Key technical or management lessons are clearly stated.							
	Skills gained - New skills or competencies developed are identified.							
	Improvement actions - Specific actions for improvement are proposed.
