

FINAL YEAR PROJECT • GUIDE

THE FYP LOGBOOK

A practical system for tracking, proving, and presenting your project work.

Why It Matters

CONTINUOUS

A live weekly record from week one — not a memory exercise in the final month.

VERIFIABLE

Every claim is backed by a screenshot, a commit, or a meeting note.

ASSESSABLE

Examiners follow one clear trail from problem to outcome.

A logbook turns months of scattered work into one defensible story — kept weekly, it protects your grade.

Anatomy of the Logbook

Cover & Project Info

Title, student & supervisor details, project scope, timeline.

Weekly Entries

Dated log of tasks, hours, decisions, and next steps.

Supporting Evidence

Screenshots, code snippets, test results, meeting minutes.

Supervisor Verification

Initials or e-signature confirming each entry was reviewed.

Four components, one purpose: a record examiners can verify without asking you to prove it later.

The Weekly Entry Workflow

Five minutes a week, in this order, is the entire discipline — nothing more is needed.

What Every Entry Needs

TASK & OBJECTIVE

What you set out to do this week, in one line.

TIME LOGGED

Hours spent, recorded honestly — not rounded up.

ISSUES & NEXT STEPS

Blockers hit, decisions made, and what follows.

Five minutes of honest notes today saves five hours of reconstruction before submission.

The Supervisor Review Loop

↻ REPEATS EVERY WEEK UNTIL FINAL SUBMISSION

No entry is complete until a supervisor has seen it — sign-off is what makes the record credible.

Habits That Keep You Audit-Ready

WITHIN 24 HOURS

Log entries the same day or the next — memory fades fast.

REAL EVIDENCE

Attach screenshots, commit links, and test outputs, not summaries.

NEVER BACKDATE

Contemporaneous notes beat convenient ones, every time.

Examiners can tell a logbook written in one sitting from one written in real time — don't let yours be the former.

YOUR LOGBOOK IS YOUR EVIDENCE

Weekly entries, no gaps

Evidence attached every time

Supervisor sign-off logged

Reflection, not just tasks

Start this week — the habit is worth more than the template.
